

ROBUST & REMOTE POWER SUPPLY

www.RoRePower.com

The project develops & demonstrates **Solid Oxide Fuel Cell systems** (high efficiency, low maintenance) for **off-grid power generation** in remote regions with very **harsh climate conditions** from -40 to +50°C e.g. for the **very difficult to access** energy supply of the gas & oil infrastructure

Interested in
**OFF-GRID POWER
WITHOUT THE HASSLE**

and the **continuous power** supplies of telecommunication towers in **outlying areas** or in **emerging countries** for e.g. telecom base stations or microwave transceivers.

Co-funded by
the European Union

This project has received funding from the Fuel Cells and Hydrogen 2 Joint Undertaking (now Clean Hydrogen Partnership) under Grant Agreement No 824953. This Joint Undertaking receives support from the European Union's Horizon 2020 Research and Innovation program, Hydrogen Europe and Hydrogen Europe Research.
